#### CERTIFICATIONS AND LIMITING CONDITIONS

SCOPE OF WORK: The scope of this appraisal consists of identifying the characteristics of the subject property that are relevant to the purpose and intended use of the appraisal. This may be accomplished by reviewing public record data, prior appraisal or other documentation from a disinterested source and which is considered reliable from the appraiser's perspective. Unless otherwise noted in the appraisal, no interior or exterior inspection of the subject property has been made. In developing this appraisal, the appraiser has incorporated only the Sales Comparison approach. The appraiser has excluded the Cost and Income approaches as not being relevant, given the agreed upon Scope of Work. The appraiser has determined that this appraisal process is not so limited that the results of the assignment are no longer credible, and the client agrees that the limited service is appropriate given the intended use. The data sources for the comparable sales may include public record data services, multiple listing services, automated valuation models and/or other data sources that become available. The confirmation of comparable sale data, i.e. closed sale documentation and property characteristics, is via public data sources only. The appraiser has not viewed the sales in the field. The data is collected, verified and analyzed, in accordance with the scope of work identified and the intended use of the appraisal. The appraiser acknowledges that an estimate of a reasonable time for the exposure in the open market is a condition in the definition of market value. The subject's marketing time is assumed to be typical for the subject's market area unless otherwise stated.

In the absence of an inspection, the appraiser has made some basic assumptions, including the following:

1. The subject property is assumed to be in average overall condition and generally conforms to the neighborhood in terms of style, condition and construction materials.

2. There are no adverse environmental conditions (hazardous wastes, toxic substances, etc.) present in the improvements, on the site, or in the immediate vicinity of the subject property.

3. There are no significant discrepancies between the public record information or other data sources and the existing site or improvements.

ANALYSIS OF ANY CURRENT AGREEMENT OF SALE, PRIOR SALE WITHIN THREE YEARS AND RECONCILIATION: Unless otherwise noted, the appraiser has no knowledge of any current agreement of sale nor any current or past listing agreement. Prior sales of the subject property within three years of the effective date of this appraisal have been researched and reported, if available from public record sources. The appraiser has reconciled the quality and quantity of data available into an Opinion of Market Value, in accordance with the intended use and scope of work.

STATEMENT OF CONTINGENT AND LIMITING CONDITIONS: The Appraiser's Certification that appears in this report is subject to the following conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect the subject property.

2. The appraiser assumes the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.

3. The appraiser will not give testimony or appear in court because he or she performed this appraisal unless specific arrangements to do so have been made beforehand.

4. Except as noted herein, the appraiser has not made an exterior or interior inspection of the subject property. The appraiser assumes that there are no adverse conditions associated with the improvements or the subject site. Unless otherwise stated in this report, the appraiser has no knowledge of any hidden or apparent conditions of the property or adverse environmental conditions (including the presence of hazardous wastes, toxic substances, etc.) present in the improvements, on the site or in the immediate vicinity that would make property more or less valuable, and has assumed that there are no such conditions. The appraiser makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser assumes that the improvements are in average condition. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report may not be considered an environmental assessment of the property.

5. The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers reliable and has no reason to believe them to be other than true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.

6. The appraiser will not disclose the content of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice.

APPRAISER'S CERTIFICATION: The appraiser certifies, to the best of my knowledge and belief:

The statements of fact contained in this report are true and correct.

2. The reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, impartial, and

unbiased professional analyses, opinions and conclusions.

3. I have no present or prospective interest in the property that is the subject of this report, and no personal interest with respect to the parties involved.

4. I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.

5. My engagement in this assignment was not contingent upon the development or reporting of predetermined results.

6. My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the
